

Amendments to the Claims:

1. (Currently Amended) A communication device including a messaging user interface, the interface being configured for: selecting a component for inclusion in a message, selecting location conditions under which the message ~~may~~is enabled to be opened by a device of a recipient, and storing said component as a message together with a message header holding the location conditions under which the message ~~may~~is enabled to be opened by the device of the recipient in a memory of the communication device.

2. (Previously Presented) A device as claimed in Claim 1, in which the message header further contains information descriptive of content of the message.

3. (Canceled)

4. (Canceled)

5. (Original) A device as claimed in Claim 1, wherein the message includes a plurality of components and associated presentation files.

6. (Original) A device as claimed in Claim 1, in which at least one component is a multimedia file.

7. (Previously Presented) A device as claimed Claim 1, wherein the device is configured for creating a presentation file associated with said component, said file being stored with said message.

8. (Previously Presented) A device as claimed in Claim 7, wherein the presentation file contains parameters relating to size and position of a component comprising a video image.

9. (Previously Presented) A device as claimed in Claim 7, wherein the presentation file contains parameters relating to a volume of a component comprising an audio recording.

10. (Previously Presented) A device as claimed in Claim 7, wherein the presentation file contains parameters relating to a color and a font of a component comprising a text string.

11. (Previously Presented) A device as claimed in Claim 1, wherein the device is configured for formatting the message as an attachment to a short text message.

12. (Previously Presented) A device as claimed in Claim 1, wherein the device is configured for formatting the message as an email.

13. (Currently Amended) A device as claimed Claim 1, including a wireless network interface, ~~means~~.

14. (Original) A device as claimed in Claim 1, wherein the device is a radio telephone.

15-22. (Canceled)

23. (Currently Amended) A method comprising:

selecting a component for inclusion in a message at a communication device;

selecting location conditions under which the message mayis enabled to be opened by a device of a recipient; and

storing said component as a message together with a message header holding the

location conditions under which the message mayis enabled to be opened by the device of the recipient in a memory of the communication device.

24. (Previously Presented) The method of Claim 23, further comprising creating a

presentation file associated with said component, and storing said presentation file with said message.

25. (Previously Presented) The method of Claim 24, wherein creating the presentation file comprises creating a file including parameters relating to size and position of a component comprising a video image.

26. (Previously Presented) The method of Claim 24, wherein creating the presentation file comprises creating a file including parameters relating to a volume of a component comprising an audio recording.

27. (Previously Presented) The method of Claim 24, wherein creating the presentation file comprises creating a file including parameters relating to a color and a font of a component comprising a text string.

28. (Previously Presented) The method of Claim 23, further comprising formatting the message as an attachment to a short text message.

29. (Previously Presented) The method of Claim 23, further comprising formatting the message as an email.
